

FAST Processing Option

Fiery XF

For performance-boosted job processing

A crucial factor in achieving profitable print production is keeping printers printing. The Fiery FAST Processing Option for Fiery XF and Fiery proServer 8 and above delivers up to 13 times faster* processing of print jobs. This GPU card-enabled acceleration technology is available for a range of EFI™ and non-EFI printers, with the choice of up to four levels of acceleration to suit the quality needs of all job types.

With an average processing speed improvement of over 6 times across the available levels, the FAST Processing Option maximizes on printer investments contributing to your bottom line.

* Performance gains are dependent on the FAST Processing level used. Factors mentioned are based on the latest Fiery proServer Premium configuration.

Specifications

System requirements

- Fiery XF 8 or Later
- 1 x CUDA enabled GPU card
 - Minimum 5GB memory
- 1 x FAST Processing Option
- FAST Processing [compatible printer](#)
