

SAFEGUARD Thin 2 mil Cold Pressure Sensitive Adhesive (PSA) Laminating PVC Films.

This product offers a clear pressure sensitive adhesive matched with a uniquely thin Clear Monomeric Calendared PVC Face film. Available in two finishes Gloss or Matte.

Key Features & Benefits

- 55 micron monomeric Calendared PVC (Shrinkage 1- 2% without printed ink)
- High Ratio of performance to price.
- Solvent based acrylic (permanent) pressure sensitive adhesive.
- Liner, Grid pattern PE silicone coating, 80 gsm
- Sizes 54" x 164'
- Finishes available - Gloss, Matte
- Lifespan: Outdoor up to 18 months +. Interior up to 3 years.
- Shelf Life: 1 year (stored up to 25°C and 50% relative humidity), in original packing

Applications:

Apply over similar constructed print films to extend life for graphic by providing abrasion & weather resistance as well as some UV stabilizer. Product will reduce application time by making printed vinyl easier to handle and install. The unique lower caliper offers the ability to easily Die-cut or Kiss-cut laminated graphics. Short-medium term indoor/outdoor general purpose graphic signage, displays, decals, POP, Advertising on Flat and simple-curve surfaces only. Always ensure printed output is dry or out-gassed before laminating.
