The imagePROGRAF PRO-4600 and PRO-2600 shown with optional multifunction roll unit.

Printer

Professional photographers, graphic designers, and more desire a wide color gamut that accurately reproduces even the most difficult colors. From stunning black-and-white prints with deep blacks, detailed gradations to extraordinary color, the Canon imagePROGRAF PRO Series is designed to achieve it all.

The imagePROGRAF 60" PRO-6600, 44" PRO-4600, and 24" PRO-2600 professional large-format printers offer an 11-Color plus Chroma Optimizer ink system that can bring your prints and reproductions to life. With intelligent media handling and color calibration technologies, these are the most advanced large format printers Canon has engineered yet.

Camera

Your photography deserves a printer worthy of your creative vision, with quality output to match. Just like many of our interchangeable L-Series lenses, the imagePROGRAF PRO Series printers are distinguished with a bold red line.

For professional photographers and graphic designers, exquisite prints with impeccable details are a must. With the latest imagePROGRAF PRO Series and the newly reformulated LUCIA PRO II ink, you can produce stunning results filled with vibrant colors or intricate black-and-white prints which make them timeless.

Features

New LUCIA PRO II Ink

Designed to produce vivid color prints with more accurate color reproduction and improved black density color output than predecessor models.

Achievable Output

- Improved black density with a wide dark-color gamut range
- High scratch resistance
- Excellent light resistance for long-term preservation of prints

Color Calibration

This helps ensure your output is color consistent over time and across multiple imagePROGRAF PRO Series devices.

Media Handling

- Intelligent media handling helps reduce time and waste
  - Automatic media feeding
  - Automatic media type, width, and length detection
  - Reduced media feed processing time from previous imagePROGRAF PRO Series models
- Multifunction Roll Unit
  - Standard with the imagePROGRAF PRO-6600
  - Optional for the imagePROGRAF PRO-4600 and imagePROGRAF PRO-2600

"Ease of Use" Body Design

- The user interface screen displays the ink levels, media indicator levels, and other setting prompts all on the home screen
- Easily see ink tanks and loaded media through translucent covers
- Interior LED light for reliable operation, such as previewing output while printing

Environmentally Conscious

These models are registered as gold products in the U.S. EPEAT® environmental assessment system by the Global Electronics Council (GEC) EPEAT Climate Criteria, a non-profit organization in the U.S. that provides verification of the environmental attributes of imaging equipment. Each model is also an ENERGY STAR® certified product. Final assembly and production for the printers is carried out at a production center in which 100 percent electricity used comes from renewable energy.

Software

Professional Print and Layout enables easy professional photo printing with editing and layout tools, as well as color management capabilities.

Free Layout Plus is a print utility that lets you nest, tile, and create custom layouts before printing your files.

Accounting Manager helps track actual ink and media usage and costs.
