

394 Shuttle Press (BOSS Embossing Press)

- Twin station high production design.
- Lifetime warranty on heat platen 1 year on machine
- Modular micro-processor control / OSHA approved actuation

- 12,000 lbs of regulated force
- Complete stand & locking casters for easy moving
- 16" x 20" or 20" x 25" heater size - Custom tables available

The 394 Shuttle Press is a high production, twin station heat transfer press. Designed for optimal pressing efficiency in a demanding heat transfer production environment, the 394 Shuttle Press removes operator inefficiency and pressing delays in a compact and user-friendly design. By utilizing two shuttling tables, the press allows for constant pressing, and the operator is able to load and unload work while the opposite table is being pressed. The next set of work is immediately available for pressing after the prior cycle, therefore minimizing both operator and press idle time.

Specifications:

Dimensions:	31½" D x 48" W x 51" H
Weight:	675 lbs net, 850 lbs crated
Electrical:	16" x 20" 3600 Watts, 16 Amps, 208/220/240V (1ph)
	20" x 25" 4500 Watts, 20 Amps, 208/220/240V (1ph)

Coupled with the Digital Knight control, and a solid steel and casting frame structure, the 394 provides extended dependable service in even the most demanding production environments. The 394 exerts up to 12,000 pounds of force, the capacity necessary for Embossing. The high wattage heater in the 394 will keep up with any heat demand, ensuring absolutely no heat recovery issues often found with standard presses. The 394 is configured for standard T-shirt & textile printing, and is easily adapted for other substrates such as ceramics, woods, metals, mousepads and fusing & laminating applications.
